

ANNEXE WINTER COTTAGE

Only available with Winter Cottage and not separately

The Annexe Winter Cottage is a separately rated property that has been rented out for something like 30 years but is currently vacant. It is reverse level with the living room kitchen upstairs and a single bedroom and bathroom downstairs. It currently shares the septic tank and electricity supply with Winter Cottage but if Winter Cottage is sold separately then new arrangements will be made. It is of stone construction for the ground floor and cavity concrete block for the first floor with recent cavity insulation. The roof is reclaimed Welsh slate. Heating is by nightstore.
