

Winter Cottage

GARDEN

The level garden is well established with mature trees to the South and West giving some protection from the prevailing winds. The area in front of the South facing main residence is paved and with the garage on one side and the Annexe on the other it has the feel of a sheltered courtyard. There are far reaching views from the rear garden. There is a semi derelict garden shed in the South West corner .The area of the whole plot is about 15,200 sq ft.
